# Charles Jackson

Email: charles.jackson39@devopsinfra.io | Phone: +1-555-499-1879 | GitHub: github.com/charlesjackson2 | Location: Remote / USA

## Professional Summary

Highly analytical and results-driven DevOps and Site Reliability Engineer with over 8 years of hands-on experience designing, automating, and optimizing mission-critical cloud infrastructure. Expert in scaling distributed applications, implementing robust CI/CD pipelines, and maintaining high-availability environments with active infrastructure observability frameworks.

## Technical Core Competencies

**Infrastructure & Automation:** Azure, Terraform, Kubernetes, Azure DevOps, Prometheus
**Monitoring & Languages:** Grafana, Linux, Bash, Python, Nagios

## Professional Experience

**Senior DevOps & SRE Specialist** - Nexus DevOps Solutions (2023 - Present)

Led infrastructure orchestration migration across distributed multi-region environments. Engineered deployment baselines using Kubernetes and handled high-throughput application state across Azure matrices. Reduced cluster failover metrics by 35% through proactive automated canary releases and comprehensive alerting configurations.

**Cloud Infrastructure Engineer** - Apex Systems (2020 - 2023)

Maintained underlying microservices platform layers leveraging Docker orchestration. Authored comprehensive infrastructure-as-code modules via Kubernetes to eliminate manual drift anomalies. Maintained deployment metrics with continuous automated pipelines via Prometheus systems.

## Education & Certifications

**B.S. in Computer Science** - State Technological University

Certified Kubernetes Administrator (CKA) | Azure DevOps Solutions Architect
