Professional Summary

Highly analytical and results-driven DevOps and Site Reliability Engineer with over 5 years of hands-on experience designing, automating, and optimizing mission-critical cloud infrastructure. Expert in scaling distributed applications, implementing robust CI/CD pipelines, and maintaining high-availability environments with active infrastructure observability frameworks.

Technical Core Competencies

Infrastructure & Automation: Azure, Terraform, Kubernetes, Azure DevOps, Prometheus
Monitoring & Languages: Grafana, Linux, Bash, Python, Nagios

Professional Experience

Senior DevOps & SRE Specialist - Quantum Cloud Labs (2023 - Present)

Led infrastructure orchestration migration across distributed multi-region environments. Engineered deployment baselines using Kubernetes and handled high-throughput application state across Azure matrices. Reduced cluster failover metrics by 35% through proactive automated canary releases and comprehensive alerting configurations.

Cloud Infrastructure Engineer - Apex Systems (2020 - 2023)

Maintained underlying microservices platform layers leveraging Docker orchestration. Authored comprehensive infrastructure-as-code modules via Kubernetes to eliminate manual drift anomalies. Maintained deployment metrics with continuous automated pipelines via Prometheus systems.

Education & Certifications

B.S. in Computer Science - State Technological University

Certified Kubernetes Administrator (CKA) | Azure DevOps Solutions Architect
