# William Miller

Email: william.miller52@devopsinfra.io | Phone: +1-555-295-4034 | GitHub: github.com/williammiller2 | Location: Remote / USA

## Professional Summary

Highly analytical and results-driven DevOps and Site Reliability Engineer with over 9 years of hands-on experience designing, automating, and optimizing mission-critical cloud infrastructure. Expert in scaling distributed applications, implementing robust CI/CD pipelines, and maintaining high-availability environments with active infrastructure observability frameworks.

## Technical Core Competencies

**Infrastructure & Automation:** GCP, Kubernetes, Pulumi, GitLab CI, ELK Stack
**Monitoring & Languages:** Docker, Python, Terraform, SRE Best Practices

## Professional Experience

**Senior DevOps & SRE Specialist** - CoreStack Systems (2023 - Present)

Led infrastructure orchestration migration across distributed multi-region environments. Engineered deployment baselines using Pulumi and handled high-throughput application state across GCP matrices. Reduced cluster failover metrics by 35% through proactive automated canary releases and comprehensive alerting configurations.

**Cloud Infrastructure Engineer** - Apex Systems (2020 - 2023)

Maintained underlying microservices platform layers leveraging Docker orchestration. Authored comprehensive infrastructure-as-code modules via Pulumi to eliminate manual drift anomalies. Maintained deployment metrics with continuous automated pipelines via ELK Stack systems.

## Education & Certifications

**B.S. in Computer Science** - State Technological University

Certified Kubernetes Administrator (CKA) | GitLab CI Solutions Architect
